

Microsoft 365 and Office 365 Review

What's a Microsoft 365 Review?

As organizations move to Microsoft 365 and Office 365 services for their collaborative operations, so does the threat against organizations' sensitive information.

The single most common cyber attack scenarios we see are phishing and spear phishing attacks against organizations' employees. Many security controls are available in Microsoft 365 and Office 365, but not all are enabled by default.

In a Microsoft 365 and Office 365 Review, we analyze your organization's implementation of security controls in Microsoft 365 and Office 365. We then create a roadmap of recommended actions to strengthen your Microsoft 365 and Office 365 security posture based on our field experience and real-world incidents and attacks. Additionally, we can make the necessary changes to your environment.

This is an excellent way to ensure that your environments are set up with the latest security features you're already paying for and to obtain actionable information on what to fix, how to fix it, and why.

Some of the areas covered in a Microsoft 365 and Office 365 Review:

- Entra ID (previously: Azure Active Directory)
- Microsoft Exchange Online
- Microsoft SharePoint Online
- Microsoft Teams
- Microsoft OneDrive for Business
- Microsoft Intune (incl. Windows Client OS)
- Microsoft 365 Defender Suite

What a Microsoft 365 and Office 365 Review Gives You

This review is a full-scope, multilayered security analysis of your Microsoft 365 and Office 365 environments. We examine how they're configured and provide actionable information explaining what should be corrected and why.

The report covers many areas focusing on best practice recommendations from Microsoft and information from different assignments conducted by TrueSec. Our information is based on the firsthand knowledge TrueSec has accumulated on the cyber threats currently facing organizations and our long experience as

experts working with Active Directory, Microsoft 365, and Office 365. Many areas are covered, and all are summarized in the Executive Summary. Please see text box above for examples.

The report is provided in both a written format and as a presentation where you and your team will have the opportunity to ask questions and get clarification from the experts at TrueSec. This is an excellent way for your team to increase their knowledge, gain insights from our specialists, and kickstart the next step – creating a roadmap based on the findings.

About Us

As a global cybersecurity company, we're proud to be at the forefront of protecting organizations and our society against cyber threats. Our purpose has been clear since day one: Creating safety and sustainability in a digital world by preventing cyber breach and minimizing impact. We never cease to challenge and reinvent ourselves to help defend your most valuable data assets every day.

The Truesec Promise

We always strive for the best results for our customers.
That's a Truesec promise.

How We Do It

Our methodology for conducting Microsoft 365 reviews is based on our extensive experience performing these assignments. Our experts have deep expertise in setting up, configuring, securing, and managing Microsoft 365 in different corporate environments.

1. Startup Meeting

We begin with an initial dialog in which we discuss your organization's situation, goals, potential threats, and prioritized risks. Here we also discuss the timetable and determine details such as when the presentation will be made, when the information will be gathered, how we obtain access, etc.

2. Information Gathering

You provide us with access to your environment for one to several days to enable us to gather the required information.

3. Information Analysis

The gathered information is analyzed utilizing the latest information from our Threat Intelligence Unit and Cybersecurity Incident Response teams. Since we conduct so many incident response investigations, we have great insight into how attackers operate and the current threat landscape.

4. Creation of Report

All this information is collected in a report, which includes an Executive Summary and all findings and recommendations in the various areas.

5. Presentation

A meeting is held for a verbal presentation of the report, which will also include a discussion on the management of identified issues.

6. Implementation of Recommendations (Optional)

We either implement the recommended changes required in your environment ourselves or together with your personnel, ensuring education and knowledge transfer to your organization.

How To Get Started

Start by talking to your Truesec customer contact or any of our experts. Together we'll begin the journey to protect your organization's sensitive information.

By conducting a Microsoft 365 and Office 365 Review, you'll gain a more secure environment, insights, and actionable information to ensure the correct level of security. This assignment will also increase your knowledge about securing and managing Microsoft 365, thereby decreasing your risk of a cyber breach and minimizing impact should one occur.
