

# Cybersecurity Enhancement Program

## What's a Cybersecurity Enhancement Program?

Truesec detects, responds to, and investigates hundreds of cyber attacks each year, providing us with unique insight into how threat actors perform their attacks and how to prevent breaches.

We can apply this battle-tested knowledge to your organization to build defensive capabilities based on your actual threats, organization, and infrastructure.

Threat actors are constantly trying to compromise your organization's IT environment, and they won't wait until you've established adequate cybersecurity resilience. It's imperative that you buy your organization the time it needs for short-term survival and long-term success.

## What You'll Gain With This Program

Our Cybersecurity Enhancement Program will help your organization take structured actions that will provide security now and a sound security strategy for the future. The aim of this program is to assist organizations interested in accelerating their initiatives to develop a strategy and make the correct short- and long-term prioritizations.

A balanced and effective level of cybersecurity requires endurance and consistency combined with focused efforts.

### Our Cybersecurity Enhancement Program enables you to:

- Gain a holistic view of your cybersecurity capabilities.
- Make the correct and most cost-effective prioritizations.
- Coordinate strategies between IT security and information security.
- Better motivate your cybersecurity investments.
- Go the extra mile guided by knowledgeable, trusted advisors.

To reach this level, you need a realistic strategy that aligns with your organization's other priorities.

The Cybersecurity Enhancement Program can help you ensure that your organization's finances and resources are used for the actions that provide the greatest value. It's a tailor-made cybersecurity program for your specific organizational needs.

## About Us

As a global cybersecurity company, we're proud to be at the forefront of protecting organizations and our society against cyber threats. Our purpose has been clear since day one: Creating safety and sustainability in a digital world by preventing cyber breach and minimizing impact. We never cease to challenge and reinvent ourselves to help defend your most valuable data assets every day.

# The Truesec Promise

We always strive for the best results for our customers.  
That's a Truesec promise.

## How We Do It

### ▪ Trusted Advisors

Truesec's trusted advisors will be your navigators through the cyber jungle and enable you to effectively establish security measures that provide the most benefits.

### ▪ Adaptive Process

We have an adaptive process where you decide the level of risk you want to take based on our experience and recommendations.

### ▪ Create a Road Map Together

Together we'll establish a road map that identifies your current caps and the way forward.

### ▪ Investments That Make a Difference

Our process provides transparent cost control where each security investment is balanced against company benefits.

### ▪ Governance and Documentation

We have a proven track record in implementing security measures that, at any time, allow you to accelerate your journey of change.

## How To Get Started

You start by talking to your Truesec customer contact or any of our experts. Together we'll begin the journey to protect your organization's sensitive information and safeguard your corporate brand by scoping the assignment and determining what actions would benefit you most.
